

INFORMATION and INSTRUCTION for the HUT GUESTS

WELCOME TO THE HUT OF SCOUT GROUP VR4!

In case of any **need** or **Emergency** please contact the following group leaders:

the scout leader appointed will give his telephone number at the arrival

- The scout hut is located in Verona, via Gela 17/19. The property is rent to the Scout Group Vr4 by Verona Municipality. There are 2 separated entrances, 3 main rooms, 1 kitchen and 2 toilettes (1 with a shower) and autonomous heating. To have the ideal temperature in the winter and to ensure hot water from washbasins and shower, ask your Vr4 Guide to explain how to start the boiler using the thermostat. It is automatic in winter and in summer it is used only for hot water. Do not touch the boiler buttons, only the thermostat.
- There is also a little garden all around the hut and behind a public park. Since there are many private flats near the hut, out of respects for the neighbors, please do not make noise and stay outside the hut after 10:30pm and before 7:00am.
- Near the club there are also a **little market**, a **Catholic Church**, a **Pharmacy** and the **bus stop no. 12** from/to railway station (*Stazione di Verona Porta Nuova*). In 30-40 minutes you can walk to the city centre.
- The activities of the group are mainly on Saturday afternoon from 15:00 to 18:00 and couple of evenings during the week, so you can meet some of them. They all have got the hut keys, so please do not open the hut to unknown people and remember to close the gates.
- We kindly ask you **to use stove and bath detergents sparingly**, if not 100% biodegradable.
- In the kitchen there are 4 **electric heating pads**, but you can use only **2 at the same time**, otherwise you can make a general black out in the hut. We recommend to do not use at the same time also hair dryers.
- There are 3 main general electric panels: 2 in the main entrances (lifesavers=salvavita) and one outside the hut. In case of black out you have to check all panels and ensure the levers are on. Your Vr4 can show you at your arrive.
- **SMOKING IS STRICTLY PROIBITED INSIDE THE HUT, IN THE GARDENS as well as on the BACK OF THE HUT (stock of gas containeres). It is not possible to light fire outside nor use gas hotplates inside.**
- In case of **emergency**, there are **2 extinguishers**, one for each entrance: in the kitchen there is a powder fire extinguisher and in the boiler room a CO2 fire extinguisher. **Call VIGILI del FUOCO 115 (Verona Fire) for any fire emergency** and then call the reference no. above. **If you have young scouts with you, ensure they do not touch nor play nor damage the fire extinguishers and related labels.**
- In the kitchen there is a little fridge (the freezer is out of order) to be connected to the socket for use and disconnected when you leave the hut.
- You are welcome to use sugar, coffee or other foods found in the kitchen, however ensure the expiration date is not passed and the foods are in good conditions (the expired pasta and rice should be used for scout manual activities).
- **When you leave the hut:**
 - Return the keys to your Vr4 Guide or leave the keys in the mailbox outside the hut (in this case inform the Vr4 Guide via mobile)
 - Leave the hut clean and put all waste in the dampster located in the main street (there are specific recycling dampsters for GLASS/TINS, PAPER, WET GARBAGE, UNDIFFERENTIATED - see the instructions on the dampsters) ...**for a better and cleaner world!!!**
 - Since we pay for the hut renting and for the utilities, we kindly ask you to leave a cash offer, based on your availability and to leave your feedback and thoughts in the Guest Book (Libro degli Ospiti) - thank you in advance!

GRAZIE e BUONA STRADA, BUONA CACCIA, BUON VOLO e BUON VENTO !!!
